

Lunenburg, July 7<sup>th</sup>, 2016

An important member in the local economy for over 28 years, Composites Atlantic Limited has recently undergone a major change in company ownership and structure and is now known as **STELIA Aerospace North America**, a division of **STELIA Aerospace (France)**, the third largest aerospace manufacturer in the world, employing over 6600 people and specializing in aerostructures, systems integration and pilot and business/first-class passenger seats.

**STELIA Aerospace North America** is proud of its success and the time is right to share it with the wider community. The success of our 2014 Family Day confirmed that people are eager to know what goes on inside our facility and it is with great pleasure that we announce our plans to expand our guest list for our first Open House event!

On **Saturday, July 9th from 10:00 a.m. to 1:30 p.m.**, we invite media, staff, community members, potential and existing customers, and our valuable business associates to meet our Managing Director and employees while learning more about our products and services. Activities include a guided tour, BBQ lunch and a job-fair-style exhibit where volunteer staff will be present to answer questions, explain the global footprint of the corporation and its divisions, and provide expertise about our business, our goals and our future.

**Location:** 71 Hall Street, Lunenburg, NS

**Program itinerary:**

- 10:00 am** Registration
- 10:15 am** Our Managing Director, Claude Baril, will officially welcome guests and introduce the leadership team.
- 10:30 am** Volunteers will guide visitors through a tour of the plant, providing an engaging and first-hand description of what we do, the parts we make, the materials we use, how we make them and what they are for.
- 11:30 am** BBQ lunch will be offered to all our guests
- 01:30 pm** Closing

We will showcase sophisticated design software and processing equipment, the materials we use, laboratory testing, as well as actual parts. Visitors will be very impressed at the high level of knowledge contained in our small East Coast community.

**Due to time, space and resource constraints, we recommend coming as early as possible to secure a place on the “first-come, first-served” guided tour schedule. You won’t want to miss this unique and enlightening event!**
