

July 17, 2015

Dear Valued Supplier:

Please review the attached documentation and have your Quality Group assess the impact of these changes on parts manufactured for Composites Atlantic Limited with regards to your responsibilities under AS9102 – “Aerospace First Article Inspection Requirement”. These changes must be submitted to all sub-tier suppliers and sub-contractors who in turn shall assess the impact on their processes and provide full or partial FAIR as per AS9102.

In accordance with AS9102, the organization shall perform a full FAI, or a partial (Delta) FAI for affected characteristics, when any of the following events occur:

1. A change in the design affecting fit, form or function of the part.
2. A change in manufacturing source(s), process(es), inspection method(s), location of manufacture, tooling or materials that can potentially affect fit, form and function.
3. A change in numerical control program or translation to another media that can potentially affect fit, form or function.
4. A natural or man-made event which may adversely affect the manufacturing process.
5. A lapse in production for two (2) years or as specified by the customer.

All communication related to FAI, Delta FAI and Quality issues should be directed to the SCQA Manager.
